

Grade 1 Term 3 Final Review Sheet

What is a computer used for?

- Computers are electronic devices that process information. They can perform a wide range of tasks, such as calculations, word processing, internet browsing, and more.

Which part of the computer do we use to move the cursor?

- The mouse is the device used to move the cursor on the screen. You can point, click, and drag items with it.

What can we use to find information on the internet?

- A search engine, like Google, helps you find information on the internet. You can type in words related to what you're looking for and get a list of websites.

Which program helps us write and draw on the computer?

- Paint is a program that allows you to draw pictures and create simple graphics. You can also use it to edit photos.

If you find a fun game online, what should you do before playing?

- It's important to ask a parent or teacher if it's okay to play a game online. They can make sure it's safe and appropriate for you.

What is a username?

- A username is a name that represents you online. It's used along with a password to log into websites and apps.

What does 'www' stand for in a website address?

- 'www' stands for World Wide Web, which is a part of the internet that includes websites and web pages.

What is an icon on the computer?

- An icon is a small picture on your computer screen that represents a program or file. When you click on it, the program opens.

What do we call the letters and numbers we press on to type?

- The keyboard is the part of the computer with keys that you press to type letters, numbers, and other symbols.

Why do we use the internet?

- The internet is used to learn and find information. It's a global network that connects computers and allows users to communicate and access data.

What should you not do on the internet?

- You should not share your personal information, like your address, with strangers on the internet. It's important to stay safe online.

What is a digital camera used for?

- A digital camera is used for taking pictures. You can save these pictures on your computer or share them online.

What is the 'desktop' on a computer?

- The desktop is the main screen on a computer where you see icons. It's like a home base where you can access programs and files.

What does it mean to 'log in' to a computer?

- To log in means to enter your username and password to access your personal account on a computer or website.

Why is it important to sit up straight when using a computer?

- Sitting up straight helps you stay healthy and comfortable. It's good for your posture and can prevent back and neck pain.
