

Grade 2 Term 3 Final Review Sheet

- **Main Function of a Computer:** A computer is an electronic device that processes information. It can perform a wide range of tasks by following a set of instructions called a program.
- **Device to Click on Things:** The mouse is the device used to interact with elements on the computer screen. It controls the movement of the cursor and selects objects.
- **Main Use of the Internet:** The internet is a global network used primarily for communication, information sharing, and access to a vast array of services, including sending emails.
- **Software to Write a Letter:** Microsoft Word is a word processing software that allows you to create, edit, and format text documents, such as letters.
- **Seeing Something Upsetting Online:** If you encounter something upsetting or inappropriate online, it's important to tell a trusted adult. They can help you manage the situation safely.
- **Purpose of a Password:** A password is a secret code used to protect your accounts and personal information from unauthorized access.
- **Search Engine:** Google is a search engine that helps you find information on the internet by typing in keywords or questions.
- **Meaning of 'VR':** VR stands for Virtual Reality, a technology that creates a simulated environment for users to interact with.

- **What is 'Coding':** Coding, or programming, is the process of writing instructions for computers to perform specific tasks.
- **Not a Part of a Computer:** A steering wheel is not a part of a standard computer setup. It's typically associated with vehicles.
- **Staying Safe Online:** To stay safe online, it's crucial not to share personal information with strangers and to be cautious about the information you post or share.
- **What is an 'Algorithm':** An algorithm is a set of steps designed to solve a problem or perform a task.
- **'Brain' of the Computer:** The CPU, or Central Processing Unit, is often referred to as the brain of the computer because it processes information and carries out instructions.
- **Device to Print Documents:** A printer is used to create physical copies of documents from the computer.
- **Logging Out on Public Computers:** Logging out of your account on public computers is important to prevent others from accessing your personal information and to protect your privacy.
