

Grade 3 Term 3 Final Review Sheet

- The Internet is often compared to a huge library¹² because it is a vast collection of information accessible to everyone.
- To access the Internet, you need all of the above: a computer, a phone line with an internet connection, and a web browser.
- Yahoo! Browser is not a web browser mentioned in the text; the others, Microsoft Edge, Google Chrome, and Apple Safari, are well-known browsers.
- To open Microsoft Edge on a computer with Microsoft Windows, you can click the Start button and click Microsoft Edge from the sidebar, type Microsoft Edge in the search bar, or click the Start button and click All Programs.
- A search engine is used to find information.
- HTTP stands for Hypertext Transfer Protocol.
- A wiki is a virtual encyclopedia.
- Wikimusic is not a wiki mentioned in the text; the others, Wikibooks, Wikiversity, and Wikinews, are examples of wikis.
- To copy and paste text from a wiki to a Word document, you should select the text with your mouse, right-click on the selected text, and click Copy.
- It is not right to copy and use text or images from the Internet without permission because it is illegal and can be considered rude.

- When communicating via instant messaging, email, blogs, and chat rooms, you should be careful and polite.
- Before forwarding or replying to email messages that tell you to forward them to your friends, you should delete them.
- If someone asks for your personal information, you should stop talking to them and tell your parents.
- The importance of using emoticons in chat rooms is to show your mood.
- When using blogs, you should avoid all of the above: using bad language, getting involved in arguments, and blaming anyone.
- It's false that it's safe to share your full name, home address, and phone number online.
- It's true that it's important to tell a trusted adult if you see something online that makes you feel uncomfortable or scared.
- It's false that clicking on pop-up ads and links from strangers is a safe way to explore the internet.
- It's true that passwords should be kept secret and not shared with anyone, even your friends.
- It's false that it's okay to post pictures of yourself and your family online as long as they're not embarrassing.
