Art Project: "Sketching the Future from the Internet"

Objective:
In this project, you will explore the internet to find a detailed image that represents the *future*. This can be anything futuristic — a cityscape, technology, fashion, vehicles, people, or even an imagined world. Once you've chosen your image, you will sketch it on paper, doing your best to match the details and structure of the original.

Instructions:

1. **Search for an image online** that represents the future. You can use sites like Google Images, Pinterest, ArtStation, or other safe and appropriate websites.
2. **Choose an image** that has enough detail to be a challenge — the more detail, the better!
3. **Print the image or save a copy** (make sure you can refer to it while you draw).
4. **Sketch the image by hand** on paper. Your goal is to recreate the image as accurately as possible.
5. Pay attention to:
   o Shapes and proportions
   o Shading and lighting
   o Details and texture
6. At the end, submit both:
   o Your finished sketch
   o The original image (printed or digital copy)
